EFFETTO PER VOCE

The nicest and most simpatico sound engineer you will ever meet is inside VoiceTone Correct. It combines pitch correction with tone and dynamic shaping that put a recorded gloss on live singing. Sensing algorithms developed at TC-Helicon automatically adjust the recording industry techniques of multiband EQ, compression and de-essing for you, so you get the best sound with the least amount of effort. Partner your new sound with auto-chromatic pitch correction which helps you sing more in tune, much like a metronome helps for playing in time. The miniaturization of sound engineers and vocal coaches was a challenge, but the results will surely impress you and your audience!
