

## BUGERA 6262 Testata Valvolare 2 Canali 120W con Riverbero

Produttore : Bugera

Cod.Art. : 6689

### TESTATA VALVOLARE 120 WATT 2 CANALI CON RIVERBERO

The BUGERA 6262 is designed to produce every species of guitar tone: grinding metal to clean pop, mammoth classic rock to twangin' country and beyond. This all-purpose, 120-Watt tone machine's incredible sound comes from six matched 12AX7 preamp tubes and four

matched, California-clean 6L6 tubes (if you'd prefer the dirtier sound of British EL34's, just flip a switch, swap out your tubes, and bingo—it's tea time). Old-school "rooster head" knobs let you control both channels of this amp in style. Both the Clean and Lead channels have their own Gain, Volume, Treble, Mid, Bass, Reverb and

Presence dials. The Clean channel is also outfitted with a Crunch button that provides an overdriven middle ground between Clean and

Lead, as well as a Bright button that provides a beautiful high-end boost. The 6262 includes an impedance switch (4, 8 and 16 Ohm) making it compatible with virtually any speaker cabinet. But there's more—the 6262 even includes a metal-clad footswitch that allows you to activate the channels and the FX Loop.

### Caratteristiche

- Hand-built 120-Watt amplifier driven by 4 x 6L6 valves (convertible to EL34)
- Classic 2-channel preamp design (Clean, Crunch, Lead) featuring 6 x 12AX7 tubes
- Integrated high-class reverb with dedicated Reverb control for each channel
- Independent Equalizer sections for each channel with dedicated Bass, Mid and Treble controls
- Classic Presence control per channel for awesome sound shaping

Amplificatori per Chitarra > Combo per Chitarra Valvolari
