

BUGERA 6260-212 Combo Valvolare 2 Canali 120W con Riverbero

Produttore : Bugera
Cod.Art. : 6691

AMPLIFICATORE COMBO VALVOLARE 120 WATT 2 CANALI CON RIVERBERO

The all-tube, 120-Watt BUGERA 6260-212 is waiting to make your guitar scream to all corners of the stratosphere through two original 12" BUGERA speakers. The 6260-212's two red-hot channels

(Clean, Lead) deliver monstrously musical power from five matched 12AX7 preamp tubes and four matched 6L6 power tubes (or, after flipping a switch, you can swap them for four EL34 tubes, giving you a gritty British sound). Vintage-style "rooster-head" dials gives you control over this amp's tone-shaping capabilities. Choose either the Low Gain or High Gain inputs, then get ready to blast some knockout Hard Rock, Metal and Classic Rock tones. There's a classic three-band EQ (Treble, Mid, Bass) and independent Volume and Gain dials for both the Lead and Clean channels. A Crunch button gives you access to an overdriven middle-ground between the two channels while the Bright button on the Clean channel gives you a chiming high-end boost. Master Reverb and Presence dials put the finishing touches on the truly rocking tones packed in the 6260-212. There's also an Impedance switch (4, 8 and 16 Ohm), making it compatible with virtually any speaker cabinet. The 6260-212 even includes a road-ready, metal-clad footswitch for full remote access to both channels. Create a signature sound that'll leave bleeding ears and blown minds in its wake with BUGERA 6260-212.

Caratteristiche
