

PRESONUS Firestudio Tube

Cod.Art. : 6824

SCHEDA AUDIO FIREWIRE

The FireStudio Tube is a world-class 24-bit/96k professional FireWire recording system loaded with the perfect combination of inputs and outputs for bands, producers, musicians and engineers to produce commercial-quality recordings. The front panel of the FireStudio Tube is loaded with two "SuperChannels" featuring class A vacuum tube microphone and instrument preamplifiers along with full-featured analog limiters. The tube preamplifiers use a high gain, military grade 12AX7 tube for maximum gain, low noise and high headroom. Neutrik combo connectors allow both XLR microphone input and hi-Z instrument input. Preamp controls include preamp gain and tube drive to achieve a wide range of sounds from smooth, clean and clear, to warm tube saturation. An 80Hz high pass filter is also located on the front panel to remove room rumble and unwanted lows.

Caratteristiche

- 24-bit/96K firewire (IEEE 1394)
- 16 inputs/6 outputs simultaneous record/playback channels
- 2 SuperChannels (tube microphone/instrument preamplifier with analog limiter)
- 8 XMAX microphone preamplifiers
- 2 PreSonus microphone/instrument preamplifiers
- 6 balanced TRS line outputs
- MIDI Input/Output
- 16x8 FireControl DSP mixer/router
- JetPLL Sync for improved imaging and clarity
- High performance A/D/A converters (114 dynamic range)

PRESONUS Firestudio Tube

- Windows and Macintosh compatible
- ProPak Software Suite including Cubase LE 4 audio production software

Requisiti di sistema

- Windows
- OS: Windows 7, Vista, XP (32-bit and 64-bit)
- CPU/Clock: or Athlon 900MHz (1.5 GHz or higher recommended)
- Memory(RAM): 1 GB (more recommended)
- Macintosh
- OS: MacOS X 10.4.x or later (10.5 supported with driver update)
- CPU/Clock: PowerPC G4/Dual 1 GHZ or faster, all Intel-based Mac

models.

- Memory(RAM): 1 GB (more recommended)

ProPak Software Suite (ver. 4)

Incluso

- Cubase LE 4 48-track music recording and production software
- Cubase LE 4 Demystified by PreSonus - DVD tutorial video
- Amplitube Duo - Virtual Guitar Amplifier
- Ampeg SVX UNO LE - Virtual Bass Amplifier
- EZ Drummer Lite - Virtual drummer plug-in
- Track Plug LE - EQ and Compressor plug-in
- MasterVerb LE - Reverb plug-in
- PreSonus EyeQ - EQ and spectral analysis plug-in
- Sony Acid Express - Loop creation software
- Martin Atkins Beat Fetish - Loop library
- Pluggo Jr. Average Injector, Chamberverb, Feedback Network, Filter Taps, Generic Effect, HF Ring Mod, Jet, Limi, Nebula, Resonation, Resosweep, Spectral Filter.
- Discrete Drums Sampler over 1GB of drum loops and drum samples

PRESONUS Firestudio Tube

- Twiddly bits 100 MIDI drum loops created by real drummers

Prezzo : €499,00 IVA inclusa (€409,02 esclusa IVA)
