

UNIVERSAL AUDIO 4110 Precision 4 Channel Microphone Preamp

Produttore : Universal Audio

Cod.Art. : 6883

PREAMPLIFICATORE PER MICROFONO A 4 CANALI

The 4110 provides four channels of premium Class A, all discrete amplification and is the first analog product from Universal Audio to break from our vintage roots and offer a world-class tool of “ultra-fidelity” and still provide musical and warm euphonics. Every channel of the 4110 features custom input stage transformers, dedicated Gain and Level controls, input and output metering, dual input impedance selection, Hi-Z inputs, and a 3-way “Shape” switch offering a variable signal-path for maximum sonic versatility.

Caratteristiche

- Discrete Class A, class-leading 74dB gain
- 3-way “SHAPE” switch: Modern/Vintage/Saturate
- Dual-stage level controls
- Fast transients, high-headroom, ultra-low noise
