

## UNIVERSAL AUDIO 2192 Dual Channel Master Audio Interface

Produttore : Universal Audio  
Cod.Art. : 6885

The 2192 Master Digital Audio Interface is the first product to combine Universal Audio's long history of creating high-quality, vintage analog gear with its advanced digital technology. While features like sample rates up to 192K, realtime transcoding between AES/EBU, S/PDIF and ADAT, and support for single and dual wire AES

modes are sure to impress, what really sets the 2192 apart is its Class-A analog circuitry, which provides luscious detail and clarity, while retaining the warmth and character of the original source, features typically not found in digital units.

### Caratteristiche

- Ultra-low noise 44.1kHz - 192kHz A/D and D/A converters
- Low jitter internal clock source provides 44.1, 48, 88.2, 96, 176.4 and 192kHz sampling rates
- DC-coupled, fully dual-differential, matched-FET, all discrete Class-A, no-compromises analog signal path
- No capacitors in the signal path to degrade sound quality or introduce phase distortion
- 2 channel ADAT S-MUX I/O for 44.1 to 48kHz transmission of 44.1 to 192kHz audio
- 2 Channel transformer coupled AES/EBU I/O (44.1kHz - 192kHz)
- Support for single and dual wire AES/EBU at 96 and 192kHz rates
- 2 Channel transformer coupled S/PDIF I/O (44.1kHz - 192kHz)
- Realtime transcoding between digital formats
- Independent digital and analog output routing

Prezzo : €2.986,00 IVA inclusa (€2.447,54 esclusa IVA)
