

TOONTRACK EZ Player PRO

Cod.Art. : 6889

MIDI ORGANIZER

EZplayer® pro is a multi track MIDI organizer, arranger and format conversion tool between mapping formats that allows you to gather all your MIDI clips in one browser. You can use EZplayer® pro to preview those MIDI clips and drag and drop them directly into your host. The multi track arranger in EZplayer® pro also makes it possible to arrange MIDI clips into fused sequences to either be saved back into the EZplayer® pro browser for later use or be dragged into your usual sequencer as part of a composition.

Caratteristiche

- MIDI engine available as a plug-in from your host that lets you organize and preview all the MIDI on your hard drive with the sampler of your choice.
- Imports your MIDI libraries by using the Add Path menu in the EZplayer® pro interface or by dragging the folders into the EZplayer® pro window.
- Multi track arranging capabilities. Sequence, edit and fuse your MIDI into new arrangements to save back into the EZplayer® pro or to drag and drop into your host for use in new compositions.
- Works with all major host applications on the market but also with Toontrack solo (Toontracks own host application, free for all registered users of Toontrack® samplers, version 1.1 required). See compatibility list for details.
- Supports any GM compliant software and hardware samplers as well as virtually all leading drum samplers on the market (including Toontrack® EZdrummer® and Superior lines of course). See compatibility list for details.

TOONTRACK EZ Player PRO

- Supports all common time signatures internally in addition to syncing to host tempo and signature.
- Split percussive MIDI files into kit pieces. Combine instrument kit pieces from one file with instruments from another to create new beats.
- Time stretch separate MIDI clips or kit pieces patterns and add accented cues to your beats with the accent tool.
- Adjust velocity, lengths or transpose single clips or entire tracks to create more dynamics in your grooves.
- Translate MIDI content between all common drum sampler formats on the market.
- Control and trigger sequences live with the MIDI hardware learn functions.
- Record and fuse multi part arrangements into single MIDI file clips.
- Search and buy MIDI content on the internet from the third party content providers listed in the interface.
- Stand alone workstation for creating MIDI beats when used in conjunction with Toontrack solo and EZdrummer® or Superior Drummer®, the award winning samplers from Toontrack®.
- MIDI content played by David "Fingers" Haynes and Per Mikaelsson (Claustrophobic EZX®) included.
- EZplayer® pro is part of the Toontrack Software Tools line and works as a Universal Binary compatible plugin in RTAS, VST and AU formats.

Prezzo : €34,50 IVA inclusa (€28,28 esclusa IVA)
