

## BEHRINGER VMX200 Pro Mixer per DJ

Produttore : Behringer

Cod.Art. : 0703

### MIXER PER DJ

The VMX200 perfectly embodies the VMX concept, combining no more channels than you need with an impressive set of state-of-the-art performance features and typical BEHRINGER audio and build quality.

Its two dual-input stereo channels allow connection of four stereo sources with top-panel selection. Each stereo channel features a gain control, an effective 3-band kill EQ with up to 32 dB of attenuation and a 45-mm ULTRAGLIDE fader with a 3-way curve switch.

In addition, the VMX200 sports a dedicated mic channel with a ULN input stage, 2-band EQ and an auto-talkover function with depth control. The PFL section is equipped with a CH-1/CH-2 balance control and a split option, which routes the channel signal to one side of the headphones and the main output signal to the other. A dual 10-segment LED level meter displays your choice of main or PFL

signals. Our impressive XPQ 3D surround effect is also on board, with ON/OFF button and depth control, as well as our automatic BPM

counter with Tempo Difference and Time Offset displays. A continuously variable crossfader curve control plus a crossfader reverse switch with our revolutionary tap-and-hold mechanism give you plenty of power for mixing tricks. Last but not least, the VMX200 features a professional VCA level engine for utmost fader precision and reliability.
