

TC ELECTRONIC PowerCore Compact

Produttore : TC Electronic

Cod.Art. : 7084

SCHEDA DSP

PowerCore Compact is a portable solution, well suited for laptop production environments on the road. With the FireWire connectors and the external power supply it only takes seconds to connect your PowerCore Compact, giving you instant access to serious processing

and production tools. With 12 powerful plug-ins right out of the box, the PowerCore Compact gives you all the tools you need for productions on the road and in the studio. Additional plug-ins can be added at any time from our ever-growing bulk of optional plug-ins. Great effort have been put into the design and the PowerCore Compact is the preferred choice when portability and instant access to powerful tools is an issue.

Compact Tools

Run all the renowned PowerCore plugs on the PowerCore Compact, without straining your hosts CPU. Spanning from classic and mega reverbs, delays, chorus, EQs, Compression over guitars amp simulation to vocal processing and old school synthesizing, you have a complete production setup. With the renowned Master X3 and the Filtrid plug-ins, and the innovative Character plug-in from Noveltech, you have some of the best processing found anywhere and all of it is included right out of the box!

Compact Power

With two 150 MHz Motorola DSPs and one 266 MHz PowerPC you have enough power for most production tasks where mobility is paramount.

Integrating seamlessly with most VST and Audio Unit host applications, the PowerCore Compact adds subtle power for demanding processing, taking the load of your laptop or tabletop PC or MAC.

Unlimited flexibility

TC ELECTRONIC PowerCore Compact

PowerCore Compact delivers the ultimate grade of flexibility. It integrates smoothly with most VST or Audio Units applications securing that all processing is possible and in correlation with your favorite music and film editing application. Hook up to 4 PowerCore Compact's into the same system via the FireWire connectors, combine it with the PowerCore FireWire for even more power, or hook it up to a system already running with PowerCore Unplugged installed. For maximum flexibility we designed the PowerCore Compact to be highly portable. All you need to get your production environment on the move is a PowerCore Compact, a laptop and a plane ticket!

Caratteristiche

- PowerCore is compatible with all VST host applications, such as Nuendo, Ableton Live, Cubase, Sonar, Wavelab, Acid, Sound Forge, a number of film- & post applications and more. This means that you can use all PowerCore plug-ins within these programs.
- PowerCore is compatible with Apple's Audio Units (AU) format. This means that PowerCore plug-ins will run in all AU compatible host applications such as Logic, GarageBand and a number of film- & post applications.
- PowerCore is compatible with RTAS (Pro Tools) via a so called wrapper. This means that in order to run PowerCore plug-ins from within ProTools, you'll need to obtain the wrapper. The wrapper is able to translate the VST format into RTAS, and this means that you can use all PowerCore plug-ins within RTAS compatible host applications, such as Pro Tools.

Requisiti di sistema

- Mac:
- Desktop or laptop.
- G4, G5, or Intel (733mHz or better).
- Mac OS X 10.4 or higher.
- 512 MB RAM or more.

TC ELECTRONIC PowerCore Compact

- X8, FireWire and Compact: 400 MBit FireWire connector (IEEE 1394)
- PCI mkII and Unplugged: A free PCI/PCI-X slot
- PowerCore Express: A free PCI Express slot
- VST, Audio Units or RTAS*) compatible application such as Logic, Nuendo, Live or Digital Performer
- Windows PC:
 - Desktop or laptop.
 - Pentium 4, 1.4 Ghz or better.
 - Windows XP or higher.
 - 512 MB RAM or more.
- FireWire and Compact: 400 MBit FireWire connector (IEEE 1394)
- PCI mkII and Unplugged: A free PCI/PCI-X slot
- PowerCore Express: A free PCI Express slot
- VST, Audio Units or RTAS*) compatible application such as Nuendo, Cubase SX, Sonar or Live.
