

TC ELECTRONIC PowerCore 6000

Produttore : TC Electronic
Cod.Art. : 7199

DIGITAL AUDIO WORKSTATION

PowerCore 6000 comprende 8 motori FreeScale DSP, gli stessi usati in System 6000, e comprende un re-design della SRAM in modo da supportare facilmente riverberi e delay ad alta performance: questo permette agli utenti di utilizzare i riverberi e i delays del System 6000 con Logic Pro, Cubase ed altre applicazioni host per VST e AU. PowerCore 6000 include anche 7 nuovissimi algoritmi, portati tal quali dal System 6000: VSS3 Stereo Source Reverb, Niolin2, DVR 2 Digital Vintage Reverb, MD3 Stereo Mastering, Brickwall Limiter, UnWrap Stereo to 5.1 e TapFactory.

Caratteristiche principali

- Pristine algorithms from TC's high-end System 6000 processor
- 8 Freescale DSPs
- SRAM based memory design supporting high performance reverbs

and delays

- For Mac and PC, Audio units and VST

Plug-in inclusi

- VSS3 Stereo Source Reverb
- MD3 Stereo Mastering
- BrickWall Limiter
- NonLin 2 Stereo Effects Reverb
- DVR2 Digital Vintage Reverb
- UnWrap Stereo to Surround Conversion
- TapFactory Multi-tap Delay
- PowerCore 6000 also includes the 14 base package plug-ins known from PowerCore X8

TC ELECTRONIC PowerCore 6000

- PowerCore 6000 is compatible with all PowerCore 3rd party plug-ins

Prezzo : €2.999,00 IVA inclusa (€2.458,20 esclusa IVA)
