cakewalk

Cod.Art. : 7511

Band-in-a-Box is a powerful and creative music composition tool for exploring and developing musical ideas with near-instantaneous feedback. Over the years many features have been added to Band-in-a-Box - Notation and Lyrics, Piano Roll, 16-channel MIDI Multitracks, Harmonization, the StyleMaker and StylePicker, a live performance Conductor window, Medley Maker, and 24 -substyle Multistyles. The Soloist and the Melodist are popular "intelligent" features that generate professional solos or even create whole new songs from scratch. RealDrums adds the human element of a live drummer while RealTracks add even more live session musicians, bringing the entire Band-in-a-Box arrangement to life. The Audio Chord Wizard has the amazing ability to analyze, extract, and show the chords from audio recordings on-screen and then write them to the Band-in-a-Box chord sheet. The inclusion of digital audio features makes Band-in-a-Box the perfect tool for creating, playing, and recording your music with MIDI, vocals, and acoustic instruments. Band-in-a-Box for Windows® can also record an acoustic instrument or voice to add to the composition, with processing through its own DirectX audio effects. Its built-in TC Helicon audio harmonies will turn your audio track into multiple harmony parts or adjust its pitch, with vibrato and scooping effects for realistic vocal styles and up to sixteen choral parts. You can print out your finished creation with lyrics, chords, repeats and endings, DC markings and codas, or save it as a graphics file for web publication or to e-mail to a friend. And when you're ready to let others hear your composition, you can burn it directly to an audio CD. Or save your composition as a Windows Media File (or in any other compressed formats you have) for a file that's "Internet ready." You'll have even more fun making automatic medleys, playing your favorite song lists in the Band-in-a-Box Jukebox, and singing along to your Karaoke files with CDG graphics.

## CAKEWALK Band in a Box 2009 PC

### Caratteristiche

- RealCharts. Most RealTracks now display notation showing the notes that are being played. Some Guitar RealTracks also show tab, and accurate on-screen fretboard guitar display to show what is being played on guitar. The RealCharts can be saved to MIDI file or Songs (MGU).

- Audio Chord Wizard Enhanced. Chords may be edited in the Audio Chord Wizard. Part markers, chord symbols, key signature, and tuning setting are saved in Band-in-a-Box, and are passed back and forth to the Chord Wizard.

- Artist Names and Bios for RealTracks. The RealTracks have been recorded by top studio musicians. Now the artist names and bios are displayed for the RealTracks.

- Freeze Song (for rapid playback). Un-Freeze Song. You can now freeze a song's arrangement. This converts the song to audio data that plays on the audio track, while the other tracks are muted. This insures that the song loads and plays quickly, without having to wait for RealTracks to generate. This feature is useful for people performing or in other situations where you are happy with the arrangement, and don't want to wait for several Real Tracks to generate. Even a long song with multiple RealTracks can now playback in a few seconds if you first freeze the arrangement.

- Melody Wizard. The QWERTY (or MIDI keyboard) Wizard has been enhanced. Now, for songs with melodies, there are QWERTY keys (Enter, \, T, 6) that trigger notes from the melody as the song is being played. Other keys trigger 1-4 approach notes from below or above. Can be recorded, to humanize a stiff melody with better timing, and approach notes also useful for sight reading, rhythm practice or to perform. Works with harmonies:

- Melody notes: T,6 ,Enter, \ Same Melody Note 5

- Approach notes qwertyuio Octave set 1,2,3

- MIDI notes also work (if Thru/Transpose OK to use Melody Wizard

- E(40) F(41) G(43) octave set

- Melody Notes. F(53) G(55)

## CAKEWALK Band in a Box 2009 PC

- Approach notes B(47),C,D,E A,B,C,D(62)
- RealTracks dialog improved with additional information.
- RealTracks Assign dialog has new columns with information for Stereo status, Set number, RealCharts status and artist name.
- RealTracks dialog can now list styles and demo songs that use the RealTracks. The Songs or Styles can be loaded in easily by menu, and played within the dialog.
- RealTracks improved arrangements
- Ability to have a delay in RealTracks track programmed into a style.
- Ability to have a delay in RealTracks track programmed into a song. These allow you to make a song or style with a more 'laid-back' feel for a certain RealTracks for example,
- Better soloing and rhythm playing, that are influenced by the key signature as well as the chords.
- Better playing of slash chords in some situations.
- Option for a "Simpler" arrangement on some RealTracks, which avoid embellishments.
- Feature for fills, turnarounds, post fills and odd/even bars to be at the right place
- Better playing on the "V" chord, since it is usually played as a V7 chord. Options added to allow a RealTrack to treat the V7 chord as a V (useful in rock styles), or to treat all 7th chords as major triads (useful in blues)
- Improved handling of CAug, CmAug, and C7+ chords
- RealTracks: more fluid playing for complex (jazz) chords like C7b9b13
- RealTracks shots improved.
- Improved RealDrums at certain tempos. When RealDrums are tempo-stretching, they now favour the speeding up a slower tempo more often, resulting in a better sounding Drums track. (Threshold changed from 10% to 4%)
- RealDrums Made By You (Or Others) that are added by you to the RealDrums folder now appear in the RealDrums Picker dialog.
- Improved Substitution Of RealDrums With Other RealDrums. When a song or style is loaded specifying a certain RealDrums, if you don't have the RealDrums, a substitution RealDrums will be

## CAKEWALK Band in a Box 2009 PC

intelligently selected using a similar style. A yellow hint message appears for a few seconds notifying you of the substitution. (in Progress)

- Notation enhancement. Patch names displayed on notation, leadsheet and printout. Example: &lt;57 trumpet&gt;
- StylePicker List Enhanced, with separate categories for RealTracks Genres (Jazz, Pop, Country, Bluegrass, Blues), over 1,000 entries.
- Save and Load Custom Preferences files, with your current settings saved and restored. For example, you can have a preferences that remembers a certain group of songs, notation transpositions etc. Return to Factory Settings now saves Preferences to disk, so that the settings can be restored at any time.
- Midi Driver Dialog Enhanced. Audio Settings button displays the MME/ASIO/ASIO Always On status. Name of VST or DXi displayed
- Enhanced "Chords - Search And Replace" Functionality
  - Search and Replace can be used with Roman Numerals or numbers for chord names. You can replace the V chord with V7, or 5m chord to 5m7. Since these are remembered between songs, it is useful if you are changing multiple songs.
  - Hotkeys Added in the menus. (e.g. Edit menu (search/replace, nudge, from to, fold)
  - Easy Entry Of Section Text On Notation Window. Typing a backslash "\" followed by any text puts that text at the beginning of the current bar as a boxed section text message. E.g. \Hello would put "Hello" in a boxed section text event.
  - Song Limit In Songpicker Increased from 10,000 to 25,000 songs.
