MIXER PROFESSIONALE PER DJ

Allen & Heath is proud to present the Xone:22 a 2-channel, analogue DJ mixer which offers the top quality audio and professional feature set usually only found in the booth of a top-rated club, all at an stunningly affordable price. They've raised the bar on entry-level mixer design with the Xone:22. It's equipped with their characteristic sound and build quality, and it's the first time a DJ mixer at this level has incorporated professional grade features, such as a full cut isolator/EQ, accurate metering, high quality faders and pro-standard audio headroom. They've incorporated a "lite" version of Xone's now legendary VCF filter system - a truly professional feature never offered at this level before. At the heart of the feature set is a lite version of the renowned analogue Voltage Control Filter (VCF) system offering Low-Pass and High-Pass filters, frequency sweep and 'mild to wild' resonance control. There is also a soft switched effects loop to bring in external effects, which are routed back in through the filter system. The new mixer has 2 stereo channels with dual phono/line inputs, and phonos can be configured to line if no RIAA sources are in use. There is a 3-band total kill EQ, crossfader curve control switch, and the maximum output level is a generous +25dBu. The main mix output and mic input are on professional standard balanced XLR's, and there is a dedicated record output. The Xone:22 is equipped with comprehensive monitoring facilities, including a booth output with its own volume control, a cue mix control, and 'cue-to-master' switch to preview the master output. There are also 10-segment LED meters with selectable bar or dot mode display for each channel. "We've raised the bar on entry level mixer design with the Xone:22. It's the first mixer at this price point to have a full cut isolator/EQ, accurate metering, quality faders and pro standard audio headroom. Incorporating a "lite"

ALLEN & HEATH XONE 22

version of our now legendary Xone filter system is the icing on the cake," explains Xone designer, Andy Rigby-Jones. "We want to offer the bedroom DJ a quality performance tool and a taste of the professional club experience." To complete the club quality effect, the Xone:22 is finished with UV sensitive ink screen for improved low light legibility.

Caratteristiche

- Phono inputs can be configured to be line level
- 2 stereo channels with dual phono/line inputs
- 3 Band full cut equalizer
- Voltage Controlled Filter system
- Soft switched (FET controlled) external effects loop
- Accurate signal level monitoring
- Main mix outputs on professional level balanced XLR connectors
- Dedicated local monitor output (booth monitor)
- Pro standard headroom (+18dB) to prevent overload
- +25dBu maximum output level (balanced XLR)
- Low audio distortion (typically 0.002% at +10dBu output)
- Dedicated record output
- Crossfader curve switch
- Cue mix control with cue to master switch
- UV sensitive ink screen for improved low light legibility
- Same high quality components as all other Xone mixers
- Universal voltage power supply

Specifiche tecniche

- 2 channels
- 4 inputs
- 3 band channel EQ with full kill
- Gain controls
- High quality replaceable crossfader with curve

ALLEN & HEATH XONE 22

options

- Master / split cue Headphone monitoring options
- 'Next to Channel' accurate LED level monitoring
- Balanced XLR master outputs
- RCA booth output
- RCA record output
- Effects loop/send & return
- Legendary A&H xone filter effect:
 - Hi / low-pass filter option
 - Frequency sweep
 - Mild / wild Resonance options
- Individual channel filter assign
- Universal voltage power supply (works anywhere in the World)
- Gun-Metal grey finish
- Weight: 5.0kg (including packaging)
- Power: 240V / 110V Switchable
