

RADIAL Tonebone BassBone

Cod.Art. : 7635

PREAMPLIFICATPRE PER BASSO CON DI BOX INTEGRATA

The Radial Bassbone is a power-packed bass preamp that combines real-world functionality with amazing tonal control, making it the ideal front end for live performance and studio recording. Designed as a bass command center, the Bassbone features two separate channels with independent level controls and powerful EQ to let you perform with two basses on stage and instantly select between them with a footswitch. With Bassbone in your rig, each bass is treated separately - no more compromising! On-demand access to the combination effects loop and power booster lets you introduce effects and gives you that extra kick when needed. The Bassbone is also equipped with a built-in Radial direct box that sends 'your sound' to the mixer the way you want it. There's even a separately buffered tuner out that lets you monitor and tune on the fly. Bassbone - the ultimate command center for serious bass players.
