

PHONIC Helix Board 12 Universal (FireWire + USB 2.0)

Produttore : Phonic

Cod.Art. : 7848

MIXER 12 INGRESSI USB2.0 FIREWIRE

The Helix Board 12 Universal is part of the new generation of Phonic's popular Helix Board mixers. It features 96 KHz USB 2.0 and FireWire interfaces that let you stream up to 10 independent channels of audio to the computer and return two channels to the mixer for monitoring - all with near-zero latency. Users are also able to utilize the main mix, ALT 3/4 and AUX 1 & AUX 2 signal for recording on the final two channels. Four extremely low noise Mic/Line preamps, each with 75 Hz low cut filters, inserts and phantom power, and two stereo Line channels offer a variety of input options. Pre/Post switches on each input channel allow users to adjust the outgoing USB 2.0 / FireWire signal between a pre-EQ, pre-fader, pre-low cut, to a post-EQ, post-fader signal. Each channel has a 3-band EQ and a mute button that sends the signal to the ALT 3-4 stereo bus, where several inputs can be grouped and controlled in tandem. Tracking individual inputs is easy with the stereo AUX cue. An onboard 32/40-bit digital multi-effect processor provides 100 popular programs, tap delay and test tones, and can be controlled through the use of a footswitch. Stereo RCA inputs and outputs make the addition of digital and analog playback and recording devices effortless. Additional features include two AUX sends, two stereo AUX returns, balanced stereo main outs, master AUX section with EFX to monitor, control room/phones source matrix and Steinberg's Cubase LE 4 digital audio workstation software.

Caratteristiche principali

- Mixer analogico 12 ingressi con circuiti a bassissimo rumore
- Onboard USB 2.0 e FireWire per inviare fino a 10 canali audio indipendenti con latenza zero

PHONIC Helix Board 12 Universal (FireWire + USB 2.0)

- Frequenza di campionamento selezionabile fino a 96kHz/24bit
- Switch Pre/Post su ciascun canale per lo scambio di invio segnali al computer da pre-low cut, da EQ a post-EQ
- Multieffetto digitale 32/40-bit DFX con 100 programmi più tap delay, tone generator e jack per foot switch
- 2 canali di monitoraggio dal computer tramite interfaccia USB 2.0 o FireWire
- Canale 9/10 instradato al computer selezionabile da main mix, ALT 3/4 e AUX 1/2
- 4 Canali mono mic/ line
- 2 Canali stereo, 2 Aux Return stereo, 2 AUX Send
- EQ a 3 bande su ogni canale
- Filtro low-cut 75Hz sul canale mono
- Inserti sul canale 1 & 2
- Alimentazione Phantom +48 V sui canali Mic
- Stereo AUX send 1 Cue per il monitoraggio dei singoli canali
- Sezione Master AUX con EFX per il monitoraggio
- Extra ALT 3-4 stereo bus
- Matrice Control Room/Phones
- Uscita Master bilanciata con fader da 60mm
- Uscita cuffie ad alto volume
- In bundle con Cubase LE5
- Dimensioni: 245 x 86 x 271mm
- Peso: 2,9kg

Requisiti minimi di sistema
Windows

- Microsoft Windows XP SP3 / Windows Vista / Windows 7 (x84 e x64)
- Porta USB o FireWire
- Processore Core 2 Duo o AMD Athlon equivalente
- Scheda madre con chipset Intel o VIA
- HDD 5400 RPM o più veloce
- RAM 1 GB

Macintosh

- OSX 10.3.5 o successivo

PHONIC Helix Board 12 Universal (FireWire + USB 2.0)

- Processore G4 o superiore
- RAM 1 GB
- Porta USB o FireWire

Prezzo : €319,00 IVA inclusa (€261,48 esclusa IVA)
