

RELOOP Digital Jockey 2 Controller Edition

Cod.Art. : 7953

CONTROLLER MIDI PER DJ

With the Digital Jockey 2 Reeloo gives Traktor DJs a controller that will make sound become truly tangible: A hardware control that facilitates such an immediate access to the world's leading DJ software plus such a great handling of all functions that both components result in a perfect team up. With its noble panel made of brushed aluminium the Digital Jockey 2 lies so well in the hand as never before. Its control panel is clearly arranged and is geared to all important Traktor PRO functions. The red illumination is very striking, white captions indicate the way to the second MIDI level. Together with the black chassis the Digital Jockey 2 also forms an optical unit with Native Instruments Traktor which is already included as the latest LE version. DJs that have been working with CD players will feel at ease with the Reeloo controller's second generation just as quickly as DJs that have been controlling Traktor via computer. The new, high-quality pitch faders are very delicate and do not lock at 0%. The Digital Jockey 2's MIDI mapping is enormous: With the glistening white shift buttons a true double assignment of all MIDI commands becomes possible. This way it is possible to control up to 4 virtual decks simultaneously with the Digital Jockey 2 and Traktor.

Caratteristiche

- Professional DJ USB/MIDI controller
- Optimized for the world's leading mixing software Traktor PRO (clearly arranged shift double assignment, control of up to 4 decks)
