

## TC HELICON VoiceTone Synth

Produttore : TC Helicon  
Cod.Art. : 7997

### EFFETTO PER VOCE

Finally, the effects you've heard on chart topping tracks from artists pushing the envelope of vocal sounds are available in a pedal. VoiceTone Synth brings together a collection of exotic and current sonic mayhem including jagged HardTune effects, a MassiveBand Vocoder with voice-controlled synth and vocal distortion and megaphone effects. Now vocalists and anyone looking to add a modern edge to their live performances and studio productions can dial-in these effects instantly with the press of a footswitch.

### Caratteristiche principali

- HardTune effect with user-selectable key or instrument-sensing
- Vocoder carrier is driven by internal voice-controlled synth or instrument input such as guitar
- Transducer effects add megaphones, distortion and radio voices
- All effects simultaneous
- Tone feature smooths overall vocal sound with adaptive live engineer processing
- Presets can be edited and stored
- Instrument Thru allows normal instrument amplification
- USB for connection to VoiceSupport application for updates, new sounds, tips & tricks
