TESTATA VALVOLARE PER CHITARRA CON RIVERBERO 55W

The 1960s witnessed the creation of amp designs destined to remain the choice of guitarists for centuries to come. Those that survived may have very different flavors, but they all have one thing in common: they respond very dynamically to the player's nuances. BUGERA captures these amps' musicality in a stunning 1x12 combo(V55) and amp head (V55HD) whose modern touches put a wider palette of vintage voicings at your fingertips. With a proud pair of 6L6 power valves in the output stage, the V55HD bathes your guitar in clean California sunshine. Let's go trippin'... Old Guts, New Glory We went to great lengths to give these amp the ability to deliver everything those dusty relics of the rock revolution did—minus the collector-sized pricetags. But in true BUGERA fashion, we took this labor of love one step farther to give you maximum tonal possibilities. To explain, we've gotta take a quick detour to the late 1940s...Before hillbillies began co-opting the blues, amps came in two varieties: those with triode (having three active electrodes) power valves and those with pentode (containing five active electrodes) power valves. Triode valves, which predated the pentodes, provide what many guitarists agree is a "softer" tone. Pentodes produce a slightly more urgent, aggressive sound. The V55 and V55HD run on power pentode tubes, but include a Mode switch that lets you run the power section as if it had triode tubes - that is, at about 40 percent less power. This gives you the option of going beyond old-school - straight to elderly school. Welcome to your personal tonal time machine.

Caratteristiche principali

- Hand-built 55-Watt guitar head driven by 2 x 6L6

BUGERA V55 HD

valves

- Way cool vintage look and feel
- Authentic 2-channel preamp design from the '60s featuring 3 x 12AX7 valves—everything from purring blues to mind-blowing crunch
- Integrated high-class reverb with dedicated Reverb control
- Vintage Equalizer section with dedicated Bass, Mid, Treble and Presence controls
- Normal and Bright inputs for ultimate sound character to perfectly match your guitar
- Multi-gain stage Lead channel with Pre Gain, Post Gain and Master controls
- Amazing Mode switch to select between Triode or Pentode operation
- Heavy-duty footswitch for Channel and Reverb function included
- Impedance switch (4, 8 and 16 Ohms) to match virtually any speaker cabinet
- High-quality components and exceptionally rugged construction ensure long life
