

VOX VT50 - Amplificatore Digitale-Valvolare 50W

Cod.Art. : 8089

AMPLIFICATORE VALVOLARE DIGITALE 50 WATT

Sophisticated modeling technology combined with the VOX Valve Reactor power amp circuit that uses a 12AX7 vacuum tube results in sound quality that overwhelms the competition. Announcing the VT series --- the latest combo amps in the Valvetronix series, featuring simulation sounds of famous guitarists. VOX Valve Reactor circuit that uses a 12AX7 to produce real tube power amp sound. Twenty-two realistic amp models are built-in, ranging from the latest high-gain types to unobtainable legendary boutique amps and vintage amps. Twelve high-quality effects including independent reverb, rivaling the quality of dedicated units Three banks (basic, effected, and song) are provided for each amp model, giving you a total of sixty-six preset programs. Twenty-two programs of "song presets" simulate the sounds of famous guitarists. You can save eight of your own edited programs. Power level control allows you to adjust the output wattage of the power amp, meaning that you can obtain that distinctive power amp distortion even at low output levels. Headphone output lets you practice at home, even at night
