

RELOOP RMP3 B

Cod.Art. : 8107

LETTORE CD MP3 PROFESSIONALE PER DJ E CONTROLLER

Across the media formats' jungle: The Reloop RMP-3 is Reloop's first true crossmedia player. Whether CD, MP3, memory stick or hard disk drive – it does not matter where the sound is coming from or how it is coded, the RMP-3 submits it to the DJ's control. As the new premium player is not only multi but crossmedial it is not only possible to mix, scratch and juggle music, but also to control any software. Thanks to the Reloop RMP-3's complete MIDI compatibility all of the 48 control elements can be applied as MIDI control device. This way the RMP series' flagship becomes the perfect controller for mixing software. As via the shift button all controls can be double assigned with MIDI commands it even becomes possible to control two virtual decks with only one RMP-3. The assignments can be saved as MIDI presets for various applications. Whatever the RMP-3 controls – due to the large touch-sensitive jog wheels the control feeling always remains outstandingly vinyl-like. Its new micro pitch with a resolution of up to 0.02% facilitates pitch adjustments with the highest precision. Via the auto loop function the fastest mixing tricks can be looped-in in no time and with seven different bar lengths. Furthermore the new bearing of the device's feet lets the RMP-3 always keep its balance. As a combination of CD/MP3 player, USB mass-storage media player and MIDI software controller the Reloop RMP-3 is up to all requirements of the DJ business. The SUV among media players.

Caratteristiche

- All control elements are MIDI compatible (45 buttons, 1 turning knob, 1 push encoder, 1 fader, 1 jog wheel), double

RELOOP RMP3 B

assignment via shift function

- USB 2.0 port for the connection of hard disks, USB sticks, etc.
