

TC ELECTRONIC G-System - Limited Edition

Produttore : TC Electronic

Cod.Art. : 8142

MULTIEFFETTO PER CHITARRA

When we released G-System, we changed the world of guitar effects forever. G-System is the first guitar system to offer a combination of the very highest quality effects, amp switching, full floor control and four built-in analog FX loops that give you the ability to integrate and control your existing pedals in the set-up. Put simply, G-System offers you the very best in effects, 'hands-on' floor control and full system integration, so it's little wonder that so many guitarists the world over have fully embraced the G-System philosophy. To celebrate this success, we have just unleashed G-System Limited, a collector's edition that looks every bit as hot as it sounds. In fact, we'd go as far as to say that the best just got a whole lot better. As you can see, G-System Limited comes housed in a stunning red adonized case - but don't think this is just about the cosmetics. Sure, G-System Limited looks red hot, but we've also turned up the heat with what's under that hood. With a completely redesigned analog circuit, G-System Limited provides the purest and most uncolored signal path yet. We've also increased the number of effects on offer with several new additions in response to your feedback. First up - and by very popular demand - we've added Univibe for that Hendrix 'Machine Gun' style phase-shifting effect. There's also an ultra-fat Doubler to help you get that classic doubling effect so prevalent in '80s and '90s Rock and Metal. G-System Limited also sports brand new Reverbs, including more realistic Room and Spring Reverbs. Other features include a new KillDry option that lets you use G-System in a parallel effects loop or even with a line mixer. Finally, we've crammed an extra 100 incredible new presets in there that will provide a wealth of inspiration, no matter what kind of music you play. G-System Limited is the ultimate, go-to effects system - and with an exclusive run of only 300 you need to grab one while you can!

Caratteristiche
