MICROFONO DINAMICO SUPERCARDIOIDE

The classic among classics, this microphone delivers outstanding audio purity. Using a rare-earth Neodymium magnet structure the TG-X 58 has become a favourite with performers. There is no better microphone than the TG-X 58 built to stand up to more serious abuses energetic live performance can only be guilty of. Beneath all of this however it is a quality supercardioid dynamic microphone, soft-lacquered for comfort and grip with a lockable On/Off switch for those quieter moments.

Caratteristiche

- High volume-before-feedback
- Heavy-duty construction
- Excellent handling
- Lockable On/Off switch
- Supplied with microphone clamp and storage bag

Specifiche tecniche

- Transducer type Dynamic
- Operating principle Pressure gradient
- Frequency response (close miking) 50 - 15,000 Hz
- Polar pattern Supercardioid
- Open circuit voltage at 1 kHz (0dB = 1V/Pa) 2 mV/Pa ≡ -54 dBV
- Nominal impedance 600 Ω
- Connector 3-pin XLR
- Length 167 mm
- Shaft diameter 22/35 mm
- Head diameter 54 mm
