

## CAKEWALK Band in a Box 2010 PC

cakewalk

Cod.Art. : 8767

### PLUG IN

There are some exciting new features in Band-in-a-Box. We've added a new "Plug-in" mode, allowing you to simply Drag-n-Drop tracks between Band-in-a-Box and your favorite sequencer (RealBand, Sonar, Reaper, ProTools, FL-Studio, Nuendo and more). RealTracks generate much faster now, typically 3X faster. RealTracks now support Shots, Holds, and Pushes. Endings are improved, and RealTracks endings are now 4 bars long, giving time for the natural decay of the instruments. Individual MIDI or Real Tracks can be frozen now, so the arrangements can be saved and fixed, and will replay quickly without need for regeneration. Soloist RealTracks are now saved with the song. We added Multiple Undo support, up to 999 levels of Undo. There are new Reverb and Bass/Treble controls for each track, allowing you to add these to individual Real tracks. All settings are now saved with each song.

### Caratteristiche

- There now is a "Plug-in" mode for your favorite sequencer (RealBand, Sonar, Reaper, ProTools, FL-Studio, Nuendo and more).
- No more long waits for RealTracks to generate! RealTracks generate much faster, 3X faster on average.
- Freezing (locking) MIDI or RealTracks/RealDrums. Any track can now be frozen (MIDI, RealTracks, or RealDrums). When frozen, it won't get changed or re-generated

## CAKEWALK Band in a Box 2010 PC

- Soloist generated RealTracks are now saved with the song, so you will hear the RealTracks play the same solo when you reload the song.
- RealTracks now support new features, including Shots, Holds, and Pushes. Simply type in the chords as you normally would, adding periods (...) for shots and holds, and the RealTracks will play them.
- RealTracks endings have been enhanced, and are now 4 bar endings instead of 2 bar, allowing time for a natural decay of the instruments.
- Up to 999 levels of undo (configurable).
- Always Save all song settings. Now all settings are saved with songs, including patches, reverbs, volume etc.
- Reverb control added for individual tracks with RealTracks or RealDrums.
- Bass/Treble Tone Control added for individual tracks with RealTracks or RealDrums, so you can easily adjust the bass/treble EQ for any RealTrack.
- Band-in-a-Box window is now sizable, when size changes, chord sheet, notation, and other windows redraw in proportion to the new size.
- New favorite songs/styles dialog, with separate lists of 'recently played' and favorite songs or styles. The previous 'favorite' songs/styles dialog was a list of recently used songs/styles. Now there are 2 tabs in this dialog, showing you both recently used songs/styles, and a new list of 'favorites' that you select as a favorite songs or styles.
- Double time and half-time support for RealTracks added.
- Automatic Tempo swapping of similar RealTracks.
- Rendering now has a Normalize option, to normalize individual tracks or the complete arrangement. Normalizing boosts the volume to a maximum level without distortion.
- RealDrums picker dialog has been enhanced, with information about Artist name, Artist bio, and RealDrums Set number.
- Songs "Saved-As" a different name now have the new name added to the Recently used song dialog.
- Support enhanced for non-concert instruments (Bb/Eb sax, trumpet etc.).

## CAKEWALK Band in a Box 2010 PC

- Rendering songs to audio is now much faster for songs with no MIDI, such as RealStyles.
- Rendering RealTracks no longer require you to have a DXi or VST in use.
- Lyrics enhanced.
- Undo added for entry of individual lyrics
- 'Enter' and 'Close' button added to lyric entry
- Lyrics toggle to editable notation view if lyric mode is entered in note roll mode, so that lyrics are visible.
- More Soloists are now available, up to 2000.
- RealTracks Picker dialog enhanced : opens up faster, new columns added, columns are now sizable, and remember the sizes.
- Rendering WAV dialog enhanced.
- StylePicker is enhanced. Favorites and Recent styles now appear in this dialog as separate lists.
- Many messages changed to "yellow alerts" at top right of screen.
- N.B. Il pacchetto spedito è la versione 2009 con annesso aggiornamento originale alla 2010.
