

TC ELECTRONIC BG500 - 210

Produttore : TC Electronic
Cod.Art. : 9534

AMPLIFICATORE COMBO PER BASSO

BG500 shares many features with the original RH450 which has already changed the way many bass players have come to think of amplification. Just ask Rocco Prestia of Tower of Power who made his very own version: Staccato'51. The powerful 500 Watt amps in the two models are identical and both have 1" Eminence tweeters, but you can choose from either 2x10" or 1x15" Eminence driver configurations. BG500 will store three of your favorite tones. You may not have used presets before, but that's only because you've never had the chance!
